

A close-up photograph of a clear glass filled with sparkling water. The water is bubbly and contains several thin slices of yellow lemons. Three fresh thyme sprigs with green leaves are placed in the glass, rising above the water level. The background is dark, making the glass and its contents stand out.

## COSMETAL® Under Bench Drinking Water Systems

drinking water solutions

CHILLED

SPARKLING

Chilled and Sparkling under-bench drinking water system—comes with gooseneck tap, filtration system (AF05), and CO2 regulator.

All systems supplied are ready to connect to separate refillable rental CO2 cylinders for economy and capacity. CO2 does not come standard with Cosmetal.

Can be used as chilled and sparkling units; or chilled only—please enquire.

**Wall Mounted Chilled Water system**

**RIVER UP**

The River Up is a practical and compact wall-mounted water chiller fed from the mains and drained to a waste trap. It offers all the advantages of a floor standing model but in a smaller space. It has low running costs and low maintenance due to the direct exchange chilling system. Available with both drinking bubbler and bottle filler, this cooler offers maximum efficiency in a compact space.
